Mr. E. C. Auchter,  
U. S. Department of Agriculture,  
Bureau of Plant Industry,  
Horticulture,  
Washington, D. C.

Dear Sir:-

We are in receipt of your letter of the 17th.  
instant and as per your request, are sending  
you herewith our latest price list.

As most of our business is in the line of Aquatic  
plants and Tropical fish, you will not find any  
of the terrestrial plants listed therein. One  
of the plants that you will be asked about quite  
a lot is our Madagascar Lace Plant, we being the  
only Commercial Distributors of this plant in the  
world. Should you ever care to see one of these,  
you might call on Mr. Fred Cringier of the  
Bureau of Fisheries Aquarium; we presented one  
of these plants with our compliments to the United  
States Government.

Thanking you for giving us a chance to let you  
know what we have, we remain,

Yours very sincerely,  
EVERGLADES AQUATIC NURSERIES, INC.

GENERAL BUSINESS TERMS

ADDRESS-

Please spell your name in print form if possible, so that there be no danger of mis-sending your order, thereby, causing delay and death to either plants or fish.

SHIPMENTS-

All shipments go forward in rotation as they come in, we reserving the right to either ship by Express or Parcel-post, whichever may be the safest at the time.

TERMS-

Orders go forward only when sufficient funds to cover are accompanied with order. Shipments made C.O.D. (either by Express or Parcel-post), will go forward only when at least 50% of the total is sent with order to guarantee acceptance of same.

SHIPPING CANS-

All fish go forward in the regular American shipping cans, for which we charge 50¢ per can and same is not returnable. Should you care to have us ship in the large German cans, we charge \$1.00 per can for same and on return of this can prepaid, we will either give you credit for the amount advanced or send you our check for same. These are returnable for credit when returned prepaid. Prepaying a returned can costs only 20¢

REPLACEMENTS-

We replace fish and plants only when accompanied by a bad order slip from the Railway Express Agency. Please examine same on arrival and if such be the case, get this bad order slip.

INQUIRIES-

We do our best to answer all questions, but for fuller instructions on fish and plants, you will find Wm. T. Innes and Ida M. Mellons books among the best authorities. For identifying fish, the Bilderatlas is the best.

RARE FISH CONT'D

ABUDEFDUF SAXATILIS  
"THE CONVICT FISH"

The newest, as well as among the most beautiful of barred fish. This new addition is one of the most graceful and interesting fishes that we know of. Above picture will give you an idea of same. The bars on these fish are very wide and are of a Blue-Black shade. These colors do not fade out and during the breeding season, there is nothing more beautiful than these fish. It is our pride and we recommend same to all Aquarists for something new and distinct. Be sure and try a pair.

OUR NEWEST AND MOST BEAUTIFUL RARITY

BLUE DEVIL FISH  
"POMACENTRUS SPEC."  
(See Bilderatlas)

These Most Beautiful Blue fish are the latest addition to the Aquatic world. They far surpass anything we now have in beauty even out shining the Solid Blue or Green Fighting Fish in color. The reason we call them Devil Fish, is because they are the Devil amongst themselves, fighting at all times, but they are so beautiful, that they are worth being kept in a separate aquarium. These fish were the sensation of the shows. Sides Blue, Tail and Fins Orange Yellow. Gorgeous is all we can say:

Per Pair              \$4.00

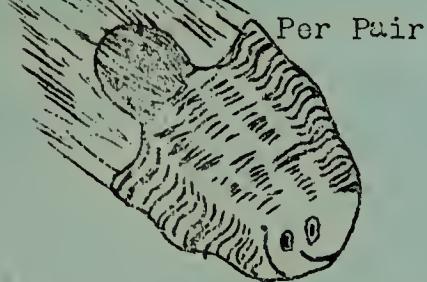

BEAUTIFUL RARITY

SPEARTAIL GUPPYI

This Newest Rarity has tail in the shape of a spearhead (we don't mean sword) and when it is excited, half of the body turns solid black. It is the most highly colored of the Guppyi variety and the males are usually twice the size of the average American Guppyi. They cause a sensation wherever presented. "Get yours before we sell out again!"

WECHSLER STRAIN

Per Pair \$1.00

Per Dozen \$5.00

AEROPLANE FISH  
FRESH WATER FLOUNDER OR SOLE

A real oddity. These Fresh Water Flounders or Sole have both eyes on one side of their head and swim different from any other fish in our aquariums. Innes calls them AEROPLANE FISH and they really look it when they start from one end of the aquarium to the other, swimming on the horizontal. Very Odd and Attractive! As well as amongst the best scavengers.

THE NEW  
MEXICAN BLUE SPOT CICHLID

NEW NAME

HERYCHTYS CYANAGUTTATUS

OLD NAME

NEETROPLUS CARPINTUS

This Cichlid has been bred only once in this country and this happened at the Greater City Aquarium Society show last year. Very odd and beautiful. Males when full grown form a hump that reminds you of our American Buffalo and both fish are flecked in Blue and Green Spots.

RARE PLANTS

!!! MADAGASCAR LACE PLANT !!!

At last, the rarest Aquatic plant in the world is available. After almost ten years of trying to get this plant into this country, we have succeeded in getting a supply and are now propagating same. Until this plant gets to be more plentiful, our price on same is \$12.00 per young plant, leaves of which average 6" to 8" in length.

For extra Large Show plants 8" to 12" in length leaves, our price is \$16.00 per plant.

We are the only distributors of the Lace Plant in the world. They are very fastly disappearing in Madagascar, their home, because the natives for countries have dug up the roots of this plant during the dry season and catch them.

NEW MADAGASCAR DWARF AQUARIUM LILY

Will bloom a light Blue lily in your aquarium in ordinary sand. We don't know its name, as the original stock came with our shipment of Madugascare Lace Plants. Does not require direct sunlight, but likes a little of it. A True live bearing lily. Reproduces young plants from center of old leaves. Very interesting.

Per Plant \$1.25
